Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a multi-region dough having filling in the first region, classified in class 426, subclass 94.
- II. Claims 17-34, 52-63, drawn to a multi-layer dough without filling and method of making it, classified in class 426, subclass 275.
- III. Claims 35-51, drawn to multi-layer dough having filling in the second layer forming a pouch-type food, classified in class 426, subclass 283.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated and independent because each dough product in the three inventions has different configuration, property and components. For instance, the dough of invention II requires the first region to have lean formulation and does not have a filling as in Inventions I and III. The dough of Invention I has a different configuration from the dough of Invention III.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lien T. Tran whose telephone number is 571-272-1408. The examiner can normally be reached on Monday, Wednesday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cano Milton can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
